

## Veryx ATTEST™ LLDP Conformance Test Suite DATASHEET

Veryx ATTEST™-CTS Link Layer Discovery Protocol (LLDP) automated test suite provides Equipment Manufacturers and Service Providers an easy and efficient solution for verification of LLDP implementation in networking devices which support transmission of capabilities and status using LLDP. ATTEST enables significant speeding up of testing cycles and reduces the "time-to-market".

Veryx ATTEST LLDP Conformance Test Suite is designed for conformance testing of Link Layer Discovery Protocol using ATTEST-- a powerful test framework that requires minimal time for set-up and enables efficient use of time and resources.

Veryx has devised approximately 149 test cases that comprehensively test for LLDP conformance. These test cases have been grouped into 7 convenient test groups based on the IEEE specifications for each category of functions.

ATTEST 802.1AB LLDP test cases verify the behavior of the LLDP agent for transmission of mandatory and optional TLVs in transmit-only and transmit-and-receive-only modes. They also verify updation of reception counters and neighbor information in receive-only and transmit-and-receive-only mode. Tests verify neighbor information updation for different MSAP identifiers received from remote LLDP agents. Tests simulate criteria for discarding LLDPDUs received with invalid sequenced TLVs or TLVs with errors.

ATTEST LLDP Conformance Test Suite is written in industry standard Tcl scripts. Well-defined APIs and source files provide the flexibility to add, customize or modify the test cases for specific requirements.

Together with ATTEST-CTS MSTP, RSTP, LLDP, VLAN and 802.1X Veryx provides one of the most comprehensive solutions for Layer-2 conformance testing. Layer-3 IPv4, BGP4+, ISISv6, RIPng, OSPFv3, IGMPv1v2/v3, PIM-DM/SMv6, Carrier Ethernet and Layer-2 Switch Test suites such as VLAN, RSTP, STP, 802.1X and LACP are also available.

### About Veryx Technologies

Veryx Technologies (formerly Net-O<sub>2</sub> Technologies) provides innovative Verification and Measurement Solutions for the global communications industry. ATTEST solutions verify networking equipment being used for Access, Carrier Ethernet, Data Center, Edge, Enterprise, Industrial and Security. The unique offerings from Veryx enable customers to reduce the "time-required-to-test" and enhance their "time-to-market".

Veryx ATTEST™ is the trademark of Veryx Technologies. All other trademarks of respective owners are acknowledged.

### SPECIFICATIONS

IEEE 802.1AB™-2005

### LLDP TESTS

- \* LLDPDU Frame Format
- \* LLDPDU Transmit
- \* LLDPDU Receive
- \* LLDPDU Basic Management TLV Handling
- \* LLDPDU Organizationally Specific TLV Handling
- \* LLDPDU Local Management
- \* LLDPDU Remote Management

### PLATFORM REQUIREMENTS

- \* ATTEST 6.x Framework
- \* Serial or additional Ethernet port for DUT management
- \* 2 Ethernet ports
